

INTRODUCTION

Your Caller ID phone stores and displays specific information, provided by your local telephone company, to subscribers of Caller ID or similar caller identification services. You must subscribe to one of these services in order to use this unit.

Your Caller ID phone enables you to:

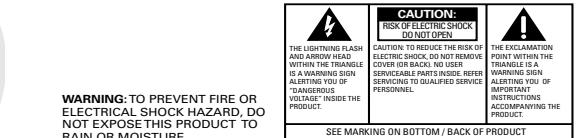

- Identify callers before you answer the phone.
- View the time and date of each incoming call.
- Record up to 40 Caller ID messages sequentially.
- Know who called while you were away.

To get the most from your new phone, we suggest that you take a few minutes right now to read through this user's guide.

IMPORTANT: In order to use this unit, you must subscribe to either the standard Name/Number Caller ID Service or Caller ID with Call Waiting Service. To know who is calling while you are on the phone, you must subscribe to Caller ID with Call Waiting Service.

IMPORTANT: Because cordless phones operate on electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home goes out.

CAUTION: When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY INSTRUCTIONS provided with this product and save them for future reference.

DIGITAL SECURITY SYSTEM

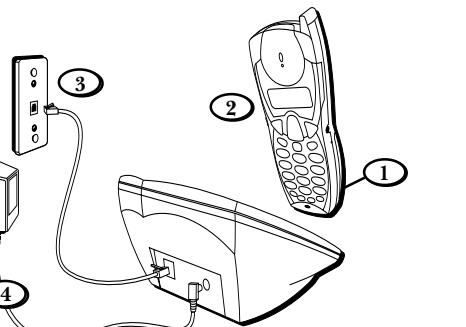

Your cordless phone uses a digital security system to provide protection against false ringing, unauthorized access, and charges to your phone line.

When you place the handset in the base, the unit verifies its security code. After a power outage or battery replacement, you should place the handset in the base for about 20 seconds to reset the code.

INSTALLATION

DESKTOP INSTALLATION

NOTE: For desktop charging only, the handset is able to charge facing up or down.

Allow the phone to charge for 12 hours prior to first use. If you don't properly charge the phone, battery performance will be compromised.

4. Remove the handset from the cradle and set aside. Turn the base over and align the four slots on the bottom of the base with the four hook-tabs on the mounting bracket.
5. Insert the hook-tabs into the slots and push upwards until the mounting bracket snaps securely into place.
6. Plug the telephone line cord into the TEL LINE jack on the back of the base and the other end into a modular jack.
7. Slip the mounting holes on the bracket over the wall plate posts and firmly slide the unit down into place (wall plate not included).

8. Place the handset in the cradle.

NOTE: If desired, gather the extra line cord together, fasten with a wire tie, and store inside the wall mounting bracket.

NOTE: The phone is shipped in Tone Dialing Mode from the manufacturer.

CAUTION: Use only the ATLINKS USA, Inc. 5-2530 power supply that came with this unit. Using other power supplies may damage the unit.

SET UP

There are five programmable menus available: Language, Area Code, RingerTone, Set Tone/Pulse, and Default Setting.

LANGUAGE SETTING SELECTION

1. Remove the battery compartment door on the handset, insert the battery pack, plug the cord into the jack (inside the compartment), and replace the compartment door.
2. Set the RINGER switch (on the handset) to ON and place the handset in the cradle on the base.
3. Plug the telephone line cord into the TEL LINE jack on the back of the base and into a modular jack.
4. Plug the power supply into the power jack on the back of the base and the other end into an electrical outlet. The "charge" indicator comes on, verifying the battery is charging.

Allow the phone to charge for 12 hours prior to first use.

If you don't properly charge the phone, battery performance will be compromised.

NOTE: The phone is shipped in Tone Dialing Mode from the manufacturer.

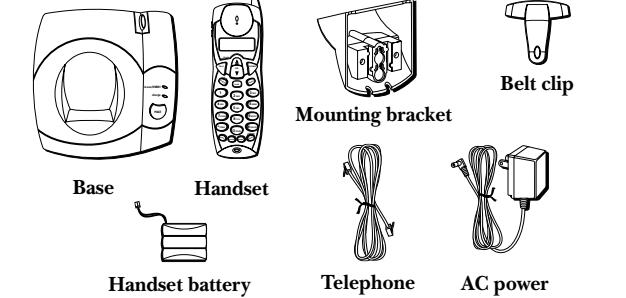

CAUTION: Use only the ATLINKS USA, Inc. 5-2530 power supply that came with this unit. Using other power supplies may damage the unit.

We bring good things to life.

BEFORE YOU BEGIN

PARTS CHECKLIST

Make sure your package includes the items shown here.

MODULAR JACK REQUIREMENTS

You need an RJ11 type modular phone jack, which is the most common type of phone jack and might look like the one pictured here. If you don't have a modular jack, call your local phone company to find out how to get one installed.

INSTALLATION NOTE: Some cordless telephones operate at frequencies that may cause interference to nearby TVs microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave ovens, or VCR. If such interference continues, move the cordless telephone farther away from these appliances. Certain other communications devices may also use the 2.4 GHz frequency for communication, and, if properly set, these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the owner's manual for these devices on how to properly set channels to avoid interference. Typical devices that may use the 2.4 GHz frequency for communication include wireless audio/video senders, wireless computer networks, multi-handset cordless telephone systems, and some long-range cordless telephone systems.

HEARING AID COMPATIBILITY

This telephone system meets FCC standards for Hearing Aid Compatibility.

FCC NUMBER IS LOCATED ON THE CABINET BOTTOM
REN NUMBER IS LOCATED ON THE CABINET BOTTOM

ATLINKS USA, Inc.

Allow the phone to charge for 12 hours prior to first use. If you don't properly charge the phone, battery performance will be compromised.

2. Use the CID Review (up or down arrow) button or the handset number pad to scroll to 1YES or 2NO.
3. Press flash/program to store selection. You will hear a confirmation tone.

CORDLESS PHONE BASICS

RECEIVING A CALL

1. Check the display to see who is calling.
2. Press the TALK button.

MAKING A CALL

To make a call, press the TALK button before you dial and press it again to hang up.

REDIAL

While the phone is on, press the redial/delete button to redial the last number you dialed (up to 32 digits). If you get a busy signal, and want to keep dialing the number, just press redial/delete again (you don't have to turn the phone off and back on).

AREA CODE SELECTION

1. Make sure the phone is OFF (not in TALK mode).

2. Press the flash/program button until "SET AREA CODE ---" shows in the display. "---" is the default setting.

3. Use the handset number pad to enter your three digit area code.

4. Press flash/program to store selection. You will hear a confirmation tone.

FLASH

Use the flash/program button to activate custom calling services such as call waiting or call transfer, which are available through your local phone company.

TIP: Don't use the TALK button to activate custom calling services such as call waiting, or you'll hang up the phone.

IN USE INDICATOR

The phone is ON when the indicator on the handset antenna is lit and the in use/VMWI indicator on the base is lit. The antenna indicator and the in use indicator on the base flashes when you receive a call.

CHANNEL BUTTON

While talking, you might need to manually change the channel in order to get rid of static. Press and release the chan button to advance to the next clear channel.

DEFAULT SETTING SELECTION

1. Press the flash/program button until "DEFAULT SETTING? 1YES 2NO" shows in the display. "2NO" is the default setting.

2. Use the CID review (up or down arrow) button or the handset number pad to scroll to 1YES or 2NO.

3. Press flash/program to store selection. You will hear a confirmation tone.

TEMPORARY TONE

This feature enables pulse (rotary) service phone users to access touch-tone services offered by banks, credit card companies, etc., by pressing the TONE button to temporarily make the phone touch-tone compatible. To get information about your bank account, for example, you would:

1. Call the bank's information line.
2. Press the TONE button (*) after your call is answered.
3. Follow the voice instructions to complete your transaction.
4. Hang up when finished. The phone returns to Pulse (rotary) service.

HOLD

Press the hold button to put a call on hold. HOLD shows in the display, and the handset antenna indicator flashes. To release a line on hold, press the hold button again or pick up an extension phone.

CANCEL

Press the cancel button to cancel any command you initiated. Press cancel to hang up after finishing a call.

FINDING THE HANDSET

This feature helps to locate a misplaced handset.

Press the PAGE button on the base. The handset beeps continuously for about 2 minutes or until you press the TALK button on the handset.

NOTE: The ringer does not have to be on for this feature to work.

RINGER SWITCH

The RINGER switch must be ON for the handset to ring during incoming calls.

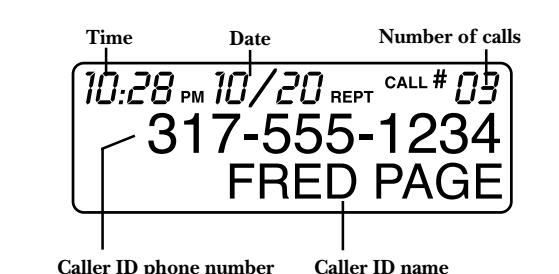

VOLUME

The VOLUME button controls the volume of the handset's earpiece. There are four volume levels. VOL 1 is the lowest level and VOL 4 is the loudest.

VOICE MESSAGING

Provided your phone company offers voice messaging service and you subscribe to it, the in use/vmw indicator on the base flashes when the phone is not in use to indicate there is a message waiting. It stops flashing after the message has been reviewed.

CALLER ID FEATURES

This unit receives and displays information transmitted by your local phone company. This information can include the phone number, date, and time; or the name, phone number, date, and time. The unit can store up to 40 calls for later review.

CALLER ID WITH CALL WAITING

Provided you subscribe to Caller ID with Call Waiting service from your phone company, you are able to see who is calling when you hear the call waiting beep. The caller identification information appears in the display after you hear the tone.

- Press the flash button to put the current person on hold so that you can answer the incoming call.

IMPORTANT: In order to use the Caller ID functions with this unit, you must subscribe to either the standard Name/Number Caller ID Service or Caller ID with Call Waiting Service. To know who is calling while you are on the phone, you must subscribe to Caller ID with Call Waiting Service.

RECEIVING AND STORING CALLS

When you receive a call, the information is transmitted by the phone company to your Caller ID telephone between the first and second ring.

When the memory is full, a new call automatically replaces the oldest call in memory. NEW appears in the display for calls received that have not been reviewed. REPT indicates that a new call from the same number was received more than once.

NOTE: Check with your local phone company regarding name service availability.

REVIEWING RECORDS

As calls are received and stored, the display is updated to let you know how many calls have been received.

- Press the CID review down button to scroll through the call records from the most recent to the oldest.
- Press the CID review up button to scroll through the call records from the oldest to the newest.

TRANSFERRING CID RECORDS TO MEMORY

You may transfer a Caller ID record to your phone's memory.

NOTE: It is important that you format CID records correctly before storing in memory. It is not possible to reformat CID records stored in memory.

1. Use the CID review (up or down arrow) button to scroll to the desired record.
2. Press the mem button.
3. Press the desired memory location. Example, press the number 1 key to store the record in memory location 1.

To replace a CID record stored in a memory location with a new CID record:

1. Repeat steps 1 through 3.
2. Press the mem button and REPLACE MEMO? shows in the display.
3. Press mem again and the new CID record replaces the old CID record in that memory location. The unit beeps twice to confirm.

DELETING RECORDS

Use the redial/delete button to erase the record currently shown in the display or all records.

DELETING THE CURRENT RECORD

1. Make sure the phone is OFF (not in TALK mode).
2. Use the CID review (up or down arrow) buttons to display the desired Caller ID record.
3. Press redial/delete. The display shows DELETE?
4. Press redial/delete again to erase the record. The unit beeps twice to confirm and the next Caller ID record shows in the display.

DELETING ALL RECORDS

1. Make sure the phone is OFF (not in TALK mode).
2. Use the CID review (up or down arrow) buttons to display any Caller ID record.
3. Press and hold redial/delete button until the unit beeps and DELETE ALL? shows in the display.
4. Press redial/delete again to erase all records. The display shows NO CALLS.

DIALING A CALLER ID NUMBER

1. Make sure the phone is OFF (not in TALK mode).
2. Use the CID review (up or down arrow) buttons to display the desired Caller ID record.
3. Press TALK/callback. The number dials automatically.

CHANGING THE CID NUMBER Format

The FORMAT button lets you change the format of the displayed CID number. The available formats are as follows.

- 7-digit** 7-digit telephone number.
- 10-digit** 3-digit area code + 7-digit telephone number.
- 11-digit** long distance code "1" + 3-digit area code + 7-digit telephone number.

1. Use the CID review (up or down arrow) buttons to scroll to the number you want to call back.

2. If the number will not dial as shown, press the FORMAT button. Repeat if necessary, until the correct number of digits are shown.

3. Press TALK/callback. The numbers dial automatically.

MUTE

Use the mute button during a phone conversation to speak privately with another person in the room. The person on the telephone will not hear your private conversation.

MEMORY

Store up to ten 24-digit numbers in memory for quick dialing. This memory feature is in addition to the 40 Caller ID records that can be stored in the Caller ID memory log.

STORING A NAME AND NUMBER IN MEMORY

1. Make sure the phone is OFF (not in TALK mode).

2. Press the mem button.

3. Press the desired memory location (0 through 9).

4. Press the mem button again. The display shows ENTER NAME.

NOTE: If you don't want to enter the name, skip step 5.

5. Use the number keys on the handset to enter the name (up to 15 characters) and press the memory button to save. More than one letter is stored in each of the number keys. For example, to enter the name Bill Smith, press the 2 key twice for the letter B. Press the 4 key 3 times for the letter I. Press the 5 key 3 times for the letter L. Press the 1 key to insert a space between the L and the S. Press the 7 key 4 times for the letter S; press the 6 key once for the letter M; press the 4 key 3 times for the letter I; press the 8 key for the letter T; press the 4 key twice for the letter H.

NOTE: The cursor will automatically move to the next position if another number key is pressed.

6. Press the mem button to save the name. The display shows ENTER TEL NUMBER.

7. Use the number keypad to enter the telephone number you want to store (up to 24 digits).

8. Press mem again to store the number.

CHANGING A STORED NUMBER

Use the same procedure to change a stored number as you do to store a number—you're just replacing the phone number with a different one.

STORING A REDIAL NUMBER

1. Make sure the phone is OFF (not in TALK mode).

2. Press redial.

3. Press the mem button.

4. Press any number key (0-9) to store the phone number in that memory location.

To replace an old redial number stored in a memory locations with a new redial number:

1. Repeat steps 1 through 4.

2. Press the mem button and REPLACE MEMO? shows in the display.

3. Press mem again and the new redial number replaces the old redial number in that memory location. The unit beeps twice to confirm.

DIALING A STORED NUMBER

1. Make sure the phone is ON by pressing the TALK/callback button.
 2. Press mem.
 3. Press the number (0-9) for the desired memory location. The number dials automatically.
- OR -**

1. Make sure the phone is OFF (not in TALK mode).

2. If the number will not dial as shown, press the FORMAT button. Repeat if necessary, until the correct number of digits are shown.

3. Press TALK/callback. The numbers dial automatically.

IMPORTANT: If you make test calls to emergency numbers stored in memory, remain on the line and briefly explain the reason for the call to the dispatcher. Also, it's a good idea to make these calls in off-peak hours, such as early morning or late evening.

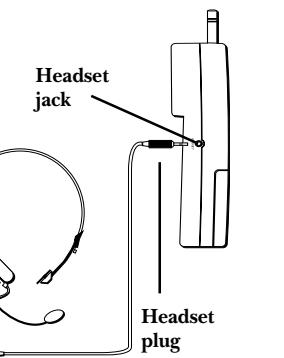

HEADSET AND BELT CLIP OPERATION

CONNECTING AN OPTIONAL HEADSET TO THE HANDSET

For hands free conversation, connect the headset (optional) to the HEADSET jack as shown. The handset receiver and microphone are disabled when the headset is connected.

Adjust the headset to rest comfortably on top of your head and over your ear. Move the microphone to approximately 2 to 3 inches from your mouth.

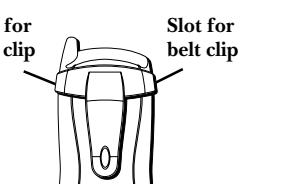

- Press the TALK button to answer or place a call before using the headset.

CONNECTING THE BELT CLIP

There are two slots, one on each side of the handset.

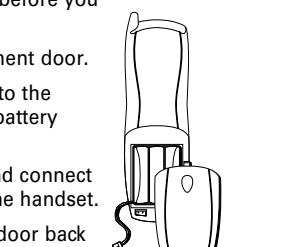

- Attach the belt clip by inserting the sides of the belt clip into the slots. Snap the ends of the belt clip into place.

CHANGING THE BATTERY

Make sure the telephone is OFF before you replace battery.

1. Remove the battery compartment door.
2. Disconnect the cord attached to the battery pack and remove the battery pack from the handset.
3. Insert the new battery pack and connect the cord into the jack inside the handset.
4. Put the battery compartment door back on.

5. Place handset in the base to charge. **Allow the handset battery to properly charge (for 12 hours) prior to first use or when you install a new battery pack. If you do not properly charge the phone, battery performance will be compromised.**

CAUTION: To reduce the risk of fire or personal injury, use only the battery listed in the instruction book.

The Number For Memory Location

Long distance access number	7
Authorization code	8
Frequently called long distance number	9

1. Make sure the phone is ON.

2. Press mem and then press 7.

3. When you hear the access tone, press mem and then press 8.

4. At the next access tone, press mem and then 9.

TIP: Wait for the access tones before pressing the next memory button, or your call might not go through.

REVIEWING AND DELETING STORED NUMBERS

1. Press mem, then use the CID review (up or down arrow) buttons to view the entry.

2. While the entry is displayed, press redial/delete to delete the entry. The display shows DELETE?

3. Press redial/delete a second time to delete the entry. DELETED shows in the display.

CHAIN DIALING FROM MEMORY

Use this feature to make calls which require a sequence of numbers such as using a calling card for a frequently called long distance number. Basically, you dial each part of the sequence from memory. The following example shows how you can use chain dialing to make a call through a long distance service:

NOTE:

The cursor will automatically move to the next position if another number key is pressed.

8. Press mem again to store the number.

CHANGING A STORED NUMBER

Use the same procedure to change a stored number as you do to store a number—you're just replacing the phone number with a different one.

STORING A REDIAL NUMBER

1. Make sure the phone is OFF (not in TALK mode).

2. Press redial.

3. Press the mem button.

4. Press any number key (0-9) to store the phone number in that memory location.

To replace an old redial number stored in a memory locations with a new redial number:

1. Repeat steps 1 through 4.

2. Press the mem button and REPLACE MEMO? shows in the display.

3. Press mem again and the new redial number replaces the old redial number in that memory location. The unit beeps twice to confirm.

CAUSES OF POOR RECEPTION

CALLER ID

Problem

Solution

No Display

- Aluminum siding.
- Foil backing on insulation.
- Heating ducts and other metal construction can shield radio signals.
- You're too close to appliances such as microwaves, stoves, computers, etc.
- Atmospheric conditions, such as strong storms.
- Base is installed in the basement or lower floor of the house.
- Base is plugged into an AC outlet with other electronic devices.

Base is plugged into an AC outlet with other electronic devices.

Baby monitor is using the same frequency.

Handset battery is low.

You're out of range of the base.

Caller ID Error Message

Solution

The unit displays this message if it detects anything other than valid Caller ID information during the silent period after the first ring. This message indicates the presence of noise on the line.

DISPLAY MESSAGES

Problem

Solution

No dial tone

- Check installation:
- Is the base power cord connected to a working outlet?
- Is the telephone line cord connected to the base unit and the wall jack?

• Disconnect the base from the wall jack and connect another phone to the same jack. If there is no dial tone in the second phone, the problem might be your wiring or local service.

• Is the handset out of range of the base?

• Make sure the battery is properly charged (12 hours).

• Is the battery pack installed correctly?

• Did the handset beep when you pressed the TALK button? Did the IN USE indicator come on? The battery may need to be charged.

• Make sure the tone/pulse setting is programmed correctly.

Dial tone is OK, but can't dial out

- Handset does not ring

Prompt confirming the Caller ID record is erased.

Prompt telling you to enter the name for one of the 10 memory locations.

Prompt telling you to enter the telephone number for one of the 10 memory locations.

Prompt asking if you want to erase Caller ID records or one of the 10 numbers stored in the phone's outgoing memory.

Prompt confirming the Caller ID record is erased.

Indicates that there is no additional information in Caller ID memory.

Indicates call or calls have not been reviewed.

The incoming call is from an area not serviced by Caller ID or the information was not sent.

Someone has pressed the PAGE button on the base.

The person is calling from a number that has been blocked from transmission.

The person's name is blocked from transmission.

Repeat call message.

Indicates that a new call from the same number was received more than once.

No Caller ID information was received.

Indicates a memory location is vacant.

Indicates no CID records have been stored.

Indicates a message is available.
